

## Pesticide

The California Department of Pesticide Regulation and the United States Environmental Protection Agency allow the unlicensed use of certain pesticides based on existing scientific evidence that there are no appreciable risks if proper use conditions are followed or that risks are outweighed by benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.

If within 24 hours following application of a pesticide, a person experiences symptoms similar to common seasonal illness comparable to the flu or influenza, the person should contact a physician, appropriate licensed health care provider, or the California Poison Control Center System (800-222-1222).

For further information, contact any of the following: for Health Questions – the County Health Department (213-974-1234) and for Regulatory Information – the Department of Pesticide Regulation (916-324-4100).

Pesticide means any substance, or mixture of substances, that is intended to be used for controlling, destroying, repelling, or mitigating any pest or organism, excluding antimicrobial pesticides as defined by the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec. 136(mm)).

## PESTICIDE DISCLOSURE - MATERIALS USED

PESTICIDES THAT HAVE BEEN OR MAY BE USED ON THE PROPERTY DURING THE COURSE OF OUR WORK: UNLESS THE PRODUCT IS MARKED WITH AN \* EFFECTS OF OVER EXPOSURE ARE SIMILAR TO COMMON SEASONAL ILLNESS COMPARABLE TO THE FLU.

Material	EPA Registration #
